# Micro Plus Software Installation guide

## Before installation of the software

Ŧ

Contractor

This is an installation guide on how to install the Micro Plus software on your PC. To run this software on your PC, ideally you will need to be running a x64 bit version of Microsoft Windows.

To check that you are running a x64 bit windows operating system you can do the following:

1. Click on the folders icon on windows 10 as circled in red below.

2. On the left side of the window, there should be a menu showing all the different folder shortcuts. Select "This PC".

3. Right click on "This PC" and select "Properties"

4. A screen will show up showing the system properties. In the System heading, will display whether your operating system is either a 64-bit operating system or 86 bit operating system. You ideally want your operating system to be a 64-bit operating system.

System	
Processor:	Intel(R) Core(TM) i3-4130 CPU @ 3.40GHz 3.40 GHz
Installed memory (RAM):	8.00 GB
System type:	64-bit Operating System, x64-based processor
Pen and Touch:	No Pen or Touch Input is available for this Display

### Installing the software

- 1. Double click on the setup file provided to begin the installation procedure.
- 2. The Welcome window will show. Click next to continue.

3. The ready to "Install the Program" will be shown. Click next to begin installing the software.
