

Mini Plus2

- Light & 4WD vehicles
- Motorcycles
- Heavy vehicles

The AutoStop Mini Plus2 is a lightweight, portable brake tester that uses advanced multi-channel sensors to accurately measure brake performance in motorcycles, light vehicles and heavy vehicles. Ideal for workshops and automotive professionals, it supports roadworthy and compliance inspections through accurate measurement of deceleration, stopping distance and lane deviation.

Compliant with:

- All Australian state and territory regulations (excluding NSW and ACT for vehicles)
- ECE Regulation 13
- MOT approved and connected

Why Choose The AutoStop Mini Plus2

- Suitable for motorcycles, light vehicles and heavy vehicles (excluding those in NSW and ACT)
- Lightweight and portable design (<500g)
- Measures tri-axial deceleration, stopping distance and lane deviation
- Self-levelling and self-aligning for easy setup
- Stores up to 200 test results
- USB-C and Bluetooth connectivity for flexible data transfer
- Backed by local support, calibration and service in Melbourne

Brake Testing in 3 Easy Steps

1 Position & Setup

Attach the AutoStop Mini Plus2 to the dashboard, centre console or passenger seat where the display is clearly visible.

2 Enter Information & Conduct the Test

Accelerate the vehicle to the required test speed and apply the brakes until the vehicle comes to a complete stop.

3 Review Results

The AutoStop Mini Plus2 automatically calculates and displays braking performance, including deceleration, stopping distance and lane deviation.

Calibration interval: 12 months

Warranty: 12 months

Note: Outer appearance and specifications are subject to change without prior notice

Standard Inclusions

- ✓ Calibration Certificate
- ✓ Declaration of Conformity
- ✓ USB-C charging cable

Optional Upgrades

- + GPS functionality
- + Bluetooth Printer
- + Rare earth magnet motorbike kit
- + Rubber suction cup motorbike kit
- + Data Logger software

Analysis of Test Results

- ✓ Average deceleration
- ✓ Maximum deceleration
- ✓ Stopping distance
- ✓ Lane deviation (side shift)
- ✓ Test duration
- ✓ MFDD (Mean Fully Developed Deceleration)
- ✓ Tri-axial deceleration (forward, lateral vertical)

Product Specifications

Physical Characteristics

- Weight: <500g
- Dimensions: 90 × 200 × 35mm

Accelerometer

- Measurement Range: $\pm 2.0g$
- Resolution: 0.01g

Display

- 16-character full alphanumeric LCD

Performance

- Storage Capacity: Up to 200 test results

Power

- Battery: Rechargeable lithium polymer battery
- Operating Time: Up to 8 hours per charge
- Charging: USB-C fast charging

Connectivity

- Interfaces: USB-C and Bluetooth

Calibration

- NATA (ISO 17025)
