

## **Net**Brake

INNOVATIVE VEHICLE TESTING & DIAGNOSTICS

Comprehensive fleet management and reporting software

## **Net**Brake®

Extend the capabilities of your AutoStop® Brake meter with this powerful fleet management and reporting software.

NetBrake® is a vehicle database and brake test reporting software application specifically developed for use with AutoStop® Brake meters. It assists the mining and heavy vehicle industries in Australia to manage brake test records, and brake test standards and calculations for their fleets.

## NetBrake®

- Offers customisation of fleet reports by company or site
- Report's pass / fail for a fleet on a range of Australian standard or custom brake calculations
- Allows you to choose your preferred unit of deceleration measurement
- Store's average and peak deceleration
- Generates individual test and vehicle test history reports
- Offers reports on the last test results for each vehicle at a company or site
- Enables identification of fleet vehicles overdue or due for brake testina
- Connects to your computer via serial cable, USB, or Bluetooth.
- Suitable for Mining Fleets
- Compliant with AS3450/ISO3450 Australian Standard
- Suitable Products AutoStop Maxi Brake Meter, AutoStop Heavy brake Meter, & AutoTest Workshop PRO10
