

AutoStop® NetBrake

The AutoStop NetBrake is a powerful fleet management and brake test reporting software designed to streamline brake testing compliance across vehicle fleets. Ideal for mining, transport and heavy vehicle operators, it centralises brake test records, automates reporting, monitors fleet compliance and helps identify vehicles due or overdue for testing, giving operators greater visibility and control over fleet safety performance.

Compliant with:

- AS / ISO 3450

Why Choose The AutoStop NetBrake

- Centralises brake test records across your entire fleet
- Generates clear pass / fail results against included brake test standards or custom brake calculations
- Identifies vehicles due or overdue for brake testing
- Produces detailed vehicle, site and fleet compliance reports
- Integrates with AutoStop brake meters and the AutoTest Workshop Pro 10
- Backed by local support in Melbourne

Brake Test Reporting in 3 Easy Steps

1 Upload Data

Download brake test results from your AutoStop brake meter or AutoTest Workshop Pro 10.

2 Review Compliance

Automatically assess pass/fail outcomes using included brake test standards or custom brake calculations.

3 Generate Reports

Create detailed vehicle, site and fleet reports, including compliance status and upcoming brake testing requirements.
