

AutoStop® Shock Pro

USB-C Bluetooth CE

Suitable for:

Light & 4WD
Vehicles

Forklift

Airport
Vehicle

Farming &
Agriculture Vehicles

Shock Pro is a suspension testing solution made up of the Shock Pro device and its companion Shock Pro app, designed to work seamlessly with the Workshop Pro tablet. Together, they measure the damping ratio of a vehicle's suspension, helping identify performance deterioration caused by worn or ageing suspension components. The system captures and records suspension response in real time, making it easy to assess ride quality, handling, and overall safety.

The tablet and app shown in the photo are for demonstration purposes only — the tablet must be purchased separately.

Specification

Shock Pro Device

- Compact & Lightweight (500grms), dimension (90 x 145 x 32mm)
- Automatic shut-off to preserve battery life
- Built in rechargeable battery
- Built in integrity check and real time clock
- Internet support hotline
- Bluetooth Interface
- PC download and Graph.
- Use alone with Tablet
- Simple two-button operation via a tactile membrane pad

Shock Pro App

- Designed for use with Workshop Pro 8 or above

Unique Feature

- Compact, battery-powered, handheld
- Easy license renewal through Workshop Manager
- Immediate print capability via optional Bluetooth Printer
- Works seamlessly with the Workshop Pro tablet
- Real-time damping ratio measurement for accurate suspension analysis
- Wireless Bluetooth connectivity for easy setup and operation
- Modular add-on to expand your Workshop Pro diagnostic capabilities
- Guided testing flow reduces user error and ensures consistency
- Interface with Workshop Pro Tablet

Product Snapshot

Fast installation with in a second

The Shock Pro device is designed for quick setup, featuring three strong suction cups at the back. This allows you to securely attach it to almost any surface with ease, saving time and ensuring stability during testing.

Intuitive Interface & Simple Testing Process

Shock Pro is designed with a user-friendly interface that makes testing quick and easy. The app guides users step-by-step through the suspension testing process, minimising setup time and reducing the chance of errors. Clear prompts, straightforward controls, and real-time feedback ensure accurate results with minimal training required. Whether you are an experienced technician or new to suspension testing, Shock Pro delivers a smooth, efficient workflow every time.

Easy Tracking of Test Results with Simple-to-Understand Graphs

Shock Pro's intuitive viewing system makes it easy to access and review both current and past test results. Damping ratio results are displayed as simple, easy-to-read graphs, helping you quickly understand suspension performance at a glance.
