AutoTest®

Battery System Tester

Light & 4WD vehicles | Heavy vehicles | Forklifts | Airport vehicles | Farming & agricultural vehicles

The AutoTest Battery System Tester is a professional battery and electrical system diagnostic solution designed to quickly assess battery health, starting performance and charging system condition. Ideal for workshops, fleet operators and roadside assistance providers, it delivers fast, accurate results to help identify failing batteries and electrical faults before they lead to unexpected vehicle downtime.

Compliant with:

- All Australian state and territory regulations
- MOT approved and connected
- SANS 1589

Why Choose The AutoTest Battery System Tester

- Fast and accurate battery, starting and charging system diagnostics
- Tests 12V, 24V and 30V batteries, including hybrid auxiliary batteries
- Identifies weak or failing batteries before they cause unexpected downtime
- Built-in printer for instant test reports and customer records
- Backed by local support and service

Learn More About The AutoTest Battery System Tester

Battery Testing in 3 Easy Steps

1. **Connect Tester**
   Connect the test clamps to the battery terminals and select the battery type, rating and test method.

2. **Run Test**
   Start the test and allow the AutoTest Battery System Tester to analyse battery health, starting performance and charging system condition.

3. **Review & Print Results**
   View battery health, CCA and system diagnostics on screen, then print or save the results for customer records and future reference.

Warranty: 12 months

Note: Outer appearance and specifications are subject to change without prior notice

AUTO TEST Products Pty Ltd®

AutoTest Products Pty Ltd
69 Parsons Street
Kensington, VIC 3031
Australia

Product Specifications

Battery Compatibility

- **Voltage:** 12V, 24V and 30V batteries
- **Battery Types:** Flooded, AGM Flat Plate, AGM Spiral, Gel and EFB
- **Hybrid Compatibility:** Supports hybrid auxiliary batteries

Battery Testing

- **CCA Range:** 100 — 2000 CCA
- State of Health (SOH)
- State of Charge (SOC)
- Cold Cranking Amp (CCA) analysis
- Bad cell detection

System Testing

- **Battery Test:** In-vehicle and out-of-vehicle
- Starting System Test
- Charging System Test
- Maximum Load Test

Measurement Capabilities

- **Voltage Range:** 1V — 30V DC
- **Current Range:** 0 — 900A DC/AC (with optional current clamp)
- **Temperature Range:** -18°C — 70°C

Operating Conditions

- **Operating Temperature:** -20°C — 60°C
- **Power Supply:** Internal 9V battery
