

AutoTest® Trailer Socket Tester

 Light & 4WD vehicles

 Heavy vehicles

The AutoTest Trailer Socket Tester is a portable trailer wiring diagnostic tool designed to quickly verify the operation and continuity of trailer socket circuits. Ideal for workshops, inspectors and automotive professionals, it provides a simple and reliable method of checking trailer light connections and identifying wiring faults without the need for a trailer to be connected to a vehicle.

Compliant with:

- Most country and state regulations
- MOT approved and connected
- SANS 1589

Why Choose The AutoTest Trailer Socket Tester

- Quickly identifies trailer socket wiring and continuity faults
- Eliminates the need to connect a trailer during testing
- Portable handheld design for fast and convenient inspections
- Suitable for 7-pin trailer sockets with removable 13-pin European adapter
- Backed by local support and service in Melbourne

Learn More About
The AutoTest Trailer
Socket Tester

Trailer Socket Testing in 3 Easy Steps

1 Connect Tester

First perform a self-check by pushing the “self-test” button, then insert the AutoTest Trailer Socket Tester into the vehicle’s trailer socket.

2 Test Circuits

Return to the driver’s seat, switch on the ignition and activate each trailer light function.

3 Verify Results

Check that the corresponding light for each circuit illuminates on the tester. Any light that fails to illuminate indicates a wiring or continuity fault requiring further investigation.

Optional

+ 13-pin European trailer socket adapter

- Expands compatibility with European trailer socket systems
- Ideal for workshops servicing a wider range of vehicles

Tests Circuits

- ✓ Left indicator
- ✓ Fog light
- ✓ Right indicator
- ✓ Right tail / side light
- ✓ Brake stop lights
- ✓ Left tail / side light

Product Specifications

Physical Characteristics

- **Design:** Portable handheld unit
- **Construction:** Water-resistant housing

Compatibility

- **Trailer Socket Type:** 7-pin trailer socket
- **Adapter Compatibility:** 13-pin European adapter
- **Vehicle System Voltage:** 12V systems only

Power

- **Battery Type:** 2 × AA alkaline batteries
- **Low Voltage Protection:** Automatic low voltage cut-out

Display

- 6 LED status indicators
- Instant pass/fail visual feedback
