

AUTO TEST® WORKSHOP PRO

Suitable for:

Light & 4WD
Vehicles

Forklifts

Airport
Vehicles

Farming &
Agriculture Vehicles

This 10" tablet serves as both a brake testing unit and advanced workshop maintenance tool. It connects directly with government reporting apps/portals in QLD, VIC, NT, and WA, and complies with roadworthy regulations across QLD, VIC, NT, WA and SA.

For ACT and NSW, a Pedal Effort Sensor is required for brake testing compliance.

Unique Features

- 10" screen with screen protector and case
- Intelligent programming
- Records test location with GPS, providing longitude & latitude
- Android-based
- Regular update required with no extra cost
- Records and accounts for slope
- Able to conduct 500+ tests on a full battery charge with up to 8 hours of continual use
- IP65 rated
- Decelerometer can be positioned in any orientation
- Automatic level compensation
- Wi-Fi and Bluetooth capability
- Interfaces with PC
- Interfaces with AutoLight Plus Magnetic
- Interfaces with AutoTest Pedal Effort Sensor

Uses Of The Tester

- Workshop maintenance logging
- ECE R13
- SANS 1589 & 10047 brake testing
- FMVSS 571
- Accident investigations
- Brake system fault-finding
- Compliant with roadworthy regulations

Optional Features

- Load cell (rated to less than $\pm 1N$, -1000N)
- Suction cups for use to secure on motorbikes, quad bikes, etc.
- Light Pro software available to connect your AutoLight Plus Magnetic window tint tester
- Pedal Effort Sensor* (NSW & ACT requirement) for compliant brake testing

Standard Accessories

- Battery charger (Australia only)
- AutoTest Bluetooth printer
- Velcro for case restraint

Product Features

- 10.1" high definition touch screen with adjustable display control
- Calculates and displays average and maximum deceleration, distance to stop, test speed and tri-axial deceleration
- Calculates and displays MFDD (Mean Fully Developed Deceleration) in accordance with ECE Reg 13
- Ultra-lightweight (530g), compact (168 x 242 x 8.1mm) and portable
- Android operating system with 16GB storage
- Wi-Fi and Bluetooth interface with micro USB for faster charging
- Up to 8 hours of continual use with rechargeable, sealed, Li-Po battery, with low battery level indicator and automatic shut-down
- Card slot: microSD, up to 128 GB (dedicated slot)
- Has WLAN (Wireless Local Area Network) to connect & communicate via Wi-Fi.
- Accelerometer: rated to less than $\pm 1\%$ over 0-1.5g
- Display: 10.1" (1920 x 1200) IPS with capacitive 10-point multitouch
- Graphical output
- GPS location (longitude/latitude)
- Average/maximum deceleration
- Test duration & speed
- Stopping distance and time to stop MFDD & sideshift
- Stores 1000+ test results via Wi-Fi or USB
- Li-Po 4850mAh rechargeable battery
- Tablet does not support sim cards
- 2MP front and 5MP back cameras
- Calibration that is internationally traceable through NATA
- GPS, Glonass or Galileo positioning receiver, providing longitude and latitude
- Position acquisition time of -1 min maximum
- 12 month calibration interval & warranty
- Both metric and imperial units of measurement
- Built-in integrity check
- Low-cost spare parts, accessories and consumables
- Comprehensive after-sales service and assistance
- Doesn't need to be level
- Automatically self positions and accounts for slope
